

# Dosepak Express<sup>®</sup> with Optilock<sup>®</sup> technology

Building adherence and brand loyalty  
every single day

Help your brand stand out with a custom-designed  
adherence solution patients prefer

- Integrates the blister and outer carton so branding stays with patients – and pills stay protected
- Ample space for messaging and links to adherence programs
- Part of a proven lineup of adherence packages
- Smaller, more convenient size
- Easy to manufacture on existing equipment

# Combining the blister and package to connect patients with your adherence programs

## Dosepak Express® with Optilock® technology

A smaller size, with even more powerful adherence benefits

**Optional fold-out flap for additional medication information and links to other adherence programs**

**Flat panels for dosing instructions and educational messaging**

**Easy-press button simplifies opening for seniors and people with arthritis**

**Discreet, portable size fits better with patients' lifestyles**

**23% smaller than the original Dosepak Express – uses less material and is lighter to transport**

**Calendared blister reminds patients to take their medication**

**Paperboard outer carton designed to maximise use of recyclable materials and minimise waste**

**Can be customised to any pill size**

**EASE-OF-USE**  
PATIENT FOUNDATION

**TO OPEN:**  
Step 1: Press & hold button gently  
Step 2: Pull out medication card

**Push Tablet Through Foil** © Lot T0000 Exp 00/00

**Order Multi Pack Here**  
Last Monthly Dose

### Lead the way to better adherence

- **Integrated design.** Blister stays attached to the outer carton to protect pills and keep branding with patients throughout the regimen
- **Comprehensive adherence platform.** Serves as a foundation for additional patient programs, expanding their reach and opt-ins
- **Patient support.** Helps healthcare providers counsel patients
- **Track record of success.** Part of proven line of adherence packages
- **Scalable solution.** Can be manufactured on existing equipment, enabling an economical, seamless transition process
- **Optional child resistance (CR).** Designed with insights from developing nearly 40 CR packaging solutions, tested to the industry's highest standards
