

WestRock

PharmaLock™ Easy Seal+

A wider range of applications.

A lower risk of damage.

WestRock PharmaLock™ Easy Seal+ is engineered to seal to a broad range of high-barrier blister foils and films, including Honeywell's Aclar®. And since it seals at a lower temperature, you can minimize the risk of damaging product. PharmaLock Easy Seal+ is a patented, extrusion-coated, heat-sealable paperboard. It's designed specifically for fold-over blister card applications such as pharmaceutical products that require child-resistant yet senior-friendly features. A smooth, uniform printing surface delivers high-impact graphics. When seeking supreme versatility, turn to PharmaLock Easy Seal+.

What You Can Expect from Us

Ultimate Flexibility

Delivers superior adhesion to a wide variety of films and foils for broader packaging applications, including PVA, PVDC-coated, PVC PET, and polystyrene. It's also compatible with Honeywell's Aclar, an increasingly popular barrier film used in pharmaceutical packaging.

Low-Temperature Seal

Effectively seals at a lower temperature than competitive alternatives. This minimizes the risk of product damage and reduces ink degradation.

Line Speed

You can expect dwell times that are up to 20% less than other heat-seal coatings. In turn, expect to see improved throughput and decreased costs.

Product Uniformity

A smooth surface delivers outstanding ink holdout and best-in-class consistency for optimal printability. Polymer coat-weight uniformity offers improved efficiencies and maximum throughput on high-speed forming and filling equipment.

Simplified Converting

Direct printing on the board eliminates the need to apply a heat-seal coating. This improves converting efficiency and reduces inventory costs.

Additional Product Information

Chain of Custody

100% PEFC Certified BMT-PEFC-0332

Food Contact

Meets multiple national requirements for food contact packaging, e.g., US and Canada. Contact your sales representative for information on specific markets and end uses.

Quality

Produced at an ISO 9001 certified facility.

Environmental and Safety

Notices under US California Proposition 65 and the EU REACH regulation are not required.

Elemental chlorine free (ECF) bleached fibre.

Meets heavy metal limits of the US Model Toxics in Packaging rules and Article 11 of EU Directive 94/62/EC.
