

WestRock

Reliant[®] Coated Cover C1S

Product Summary

WestRock Reliant cover is the ideal choice for C1S graphic and specialty packaging applications that demand reliable performance, excellent converting properties and a pleasing warm-white shade.

Features and Benefits

Superior consistency

Six Sigma manufacturing methodology coupled with a solid bleached sulfate design provides improved consistency from run to run compared to multi-ply products that utilize varied fiber sources for the middle layer.

Good ink holdout

Fully double-coated top side offers a smooth, uniform print surface that results in higher print gloss for sharper image reproduction.

Excellent converting

Solid bleached construction ensures cleaner die cutting and sheeting. It is also ideal for embossing when intricate detail is desired.

Caliper range

Available with same performance attributes, brightness and shade for 10 pt caliper up to 28 pt in rolls or skids.

Fade resistance

Proven to maintain color and shade better than competitive folding box board (FBB) imports—ideal for store signage or display applications where it is important to maintain critical brand colors.

Product Uses

- Advertising Collateral
- Store Signage
- POP Displays
- Pocket Folders
- Heavyweight Brochures
- Specialty Packaging & Inserts
- Tags & Labels
- Greeting Cards
- Book Covers
- Game Cards
