Tango® Coated Cover C2S

Product Summary
Superior print performance. Superior product aesthetics. WestRock Tango® consistently delivers on both. Unsurpassed in its proven reputation for outstanding runnability, printability and consistency on press and through converting.

Features and Benefits

Outstanding ink holdout
Printed images look richer, have greater depth and are more lifelike, for optimum visual appeal.

Better dot integrity
Proprietary coating, coupled with an ultra-smooth surface, reduces dot gain so that printed images are sharper—ideal for capturing fine detail. Better dot integrity also enhances color control on press to facilitate matching to a proof in less time.

Clean-white styling
Unique clean-white shade is preferred by more printers and end users to deliver crisp colors and contrast, while maintaining color fidelity on press.

Superior consistency
Six Sigma manufacturing methodology coupled with a solid bleached sulfate design provides improved consistency from run to run compared to multi-ply products that utilize varied fiber sources for the middle layer.

Quality tactile feel
Specialized finishing process results in a coated cover that offers greater heft, so the finished printed piece “feels” as good as it looks.

Fade resistance
Paper shade is achieved using colorfast dyes to provide improved color integrity and extended shelf life for printed material.

Side-to-side uniformity
Full double coating both sides and identical finishing process result in outstanding side-to-side uniformity of print performance and runnability on press.

Product Uses
- Signage
- POP Displays
- Direct Mail
- Menus
- Greeting Cards
- Trading and Game Cards
- Annual Report Covers
- Brochures and Inserts
- Specialty Packaging

Product Classifications
Product type
- SBS Paperboard/GZ C2S
- Coated Cover

Structure
- Solid Bleached Sulfate
- Double Clay Coated Both Sides
Additional Product Information

Sustainability

• Recyclable.
• Recycled fiber content available by specification.
• All WestRock North American paperboard mills are certified to the SFI®, PEFC™, FSC® Chain-of-Custody Standards. Contact your WestRock sales representative for certified fiber availability for this product.

Food Contact

• Meets multiple national requirements for food contact packaging, e.g., U.S. and Canada. Contact your sales representative for information on specific markets and end uses.

Quality

• Produced at an ISO 9001 certified facility.

Environmental and Safety

• Notices under U.S. California Proposition 65 and the EU REACH and Safety are not required.
• Elemental Chlorine Free (ECF) bleached fiber.
• Meets heavy metal limits of the U.S. Model Toxics in Packaging rules and Article 11 of EU Directive 94/62/EC.
