

Make a great impression

Tango[®] Coated Cover C2S

Product Summary

Superior print performance. Superior product aesthetics. Tango consistently delivers on both. Unsurpassed in its proven reputation for outstanding runnability, printability and consistency on press and through converting.

Features and Benefits

Outstanding ink holdout Printed images look richer, have greater depth and are more lifelike, for optimum visual appeal.

Better dot integrity Proprietary coating, coupled with an ultra-smooth surface, reduces dot gain so that printed images are sharper—ideal for capturing fine detail. Better dot integrity also enhances color control on press to facilitate matching to a proof in less time.

Clean-white styling Unique clean-white shade is preferred by more printers and end users to deliver crisp colors and contrast, while maintaining color fidelity on press.

Superior consistency Six Sigma manufacturing methodology coupled with a solid bleached sulfate design provides improved consistency from run to run compared to multi-ply products that utilize varied fiber sources for the middle layer.

Quality tactile feel Specialized finishing process results in a coated cover that offers greater heft, so the finished printed piece “feels” as good as it looks.

Fade resistance Paper shade is achieved using colorfast dyes to provide improved color integrity and extended shelf life for printed material.

Side-to-side uniformity Full double coating both sides and identical finishing process result in outstanding side-to-side uniformity of print performance and runnability on press.

Product Uses

- Signage
- POP Displays
- Direct Mail
- Menus
- Greeting Cards
- Trading and Game Cards
- Annual Report Covers
- Brochures and Inserts
- Specialty Packaging
